[Izaci Namaqhalo Esixhosa Pdf 28](#)

Next Generation Science Standards
2nd Grade

	LIFE SCIENCE <u>Ecosystems: Interactions, Energy, and Dynamics</u>	PHYSICAL SCIENCE <u>Structure and Properties of Matter</u>
2-ESS1 Earth's Place in the Universe 2-ESS2 Earth's Systems	2-ESS1 Ecosystems: Interactions, Energy, and Dynamics	2-PS1 Matter and Its Interactions
2-ESS1-1. Use information from several sources to provide evidence that Earth events can occur quickly or slowly. <i>(i.e. Compare relative timescales of volcanic eruptions and earthquakes with weathering and erosion.)</i>	2-ESS1-1. Plan and conduct an investigation to determine if plants need sunlight and water to grow. <i>(Only test one variable at a time.)</i>	2-PS1-1. Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties. <i>(i.e. Inflexible)</i>
2-ESS1-2. Compare multiple solutions designed to slow or prevent wind or water from changing the shape of the land. <i>(i.e. Compare dikes and berms, types of windbreaks, erosion resistant planting.)</i>	2-ESS2-2. Develop a simple model that mimics the function of an animal in dispersing seeds or pollinating plants. <i>(Note: seeds catching on (i.e. and study of bee, moth, butterfly, bird, or other animal pollinators.)</i>	2-PS1-2. Make observations to construct an evidence-based argument that some materials have different properties that are best suited for an intended purpose. <i>(Note: Use data above to choose materials.)</i>
2-ESS2-3. Develop a model to represent the shapes and kinds of land and bodies of water in an area. <i>(Note: watercolor models with clay or paper.)</i>	2-ESS2-3. Obtain information to identify where water is found on Earth and that it can be solid or liquid. <i>(Note: use maps, Google Earth.)</i>	2-PS1-3. Make observations to construct an evidence-based argument that some changes caused by heating or cooling can be reversed and some cannot. <i>(i.e. Water and butter changes can be reversed, but cooking an egg or burning a piece of paper cannot.)</i>
	Biological Evolution: Unity and Diversity	
	2-GB Biological Evolution: Unity and Diversity	
	2-GB-1. Make observations of plants and animals to compare the diversity of life in different habitats. <i>(i.e. study the range of different living things that exist in each habitat.)</i>	
NGSS Engineering - K-2-ETS1: Engineering Design		
K-2-ETS1-1. Ask questions, make observations, and gather information about a situation people want to change to define a simple problem that can be solved through the development of a new or improved object or tool.		
K-2-ETS1-2. Develop a simple sketch, drawing, or physical model to illustrate how the shape of an object helps it function as needed to solve a given problem.		
K-2-ETS1-3. Analyze data from tests of two objects designed to solve the same problem to compare the strengths and weaknesses of how each performs.
